

Appln. 10/553,404
Response dated August 10, 2010

REMARKS/ARGUMENTS

This paper is submitted further responsive to the office action mailed March 10, 2010, and is accompanied by an RCE. Reconsideration of the application in light of the accompanying remarks and arguments is respectfully requested.

By the present response, a typographical error in claim 4 has been corrected, and new claims 25 and 26 have been added. New claims 25 and 26 call for more structural detail with respect to the mixing chamber and temperature control channels, and this structure is not shown in the prior art of record. Arguments against the prior art rejections from the last action are of record in the request for reconsideration which was filed on July 9, 2010. In the accompanying RCE, a suspension of proceedings to allow an interview to be held has been requested.

Please charge the extra claim fee for claims 25 and 26 to deposit account 02-0184. A petition for extension of time also accompanies this filing.

It is believed that no other fee is due in connection with this paper. If any fee is due, please charge same to Deposit Account
02-0184.

Respectfully submitted,

Martin Brenner et al.
